

THE SCHEDULING SOLUTION FOR THE MODERN CAMPUS

Academic classroom and event scheduling in one platform

- Robust classroom and exam scheduling capabilities
- Simplify risk planning initiatives with dashboards and automated updates and notifications
- Stable, end-to-end platform that replaces and integrates with many systems
- Improve organizational efficiency and space utilization

In today's fast-paced, ever-changing higher education environment, real estate is more valuable than ever. Managing a complex campus requires a centralized software solution that allows for a more effective, efficient, and optimized use of all spaces. To meet these demands, EMS software provides:

- One system of record, with instant insight into space usage and rapid communications to support campus risk mitigation and emergency response planning
- Integrated self-service scheduling for students, faculty, staff, and even members of the community
- 120+ pre-defined reports and a custom query builder to provide insight on everything from classroom seat-fill percentage to invoicing and billing of your event spaces
- Your choice of software hosting: on your own infrastructure or in our Cloud

EMS Campus offers the functionality your academic and event schedulers demand, with seamless integrations to support and leverage your existing technology infrastructure. EMS also manages self-service study spaces, faculty and employee offices, and campus events.

ACADEMIC SCHEDULING

- Provides seamless, bidirectional integration with commercial student information systems (SIS) with real-time updating
- Use the EMS Optimizer for bulk scheduling based on defined policies and preferences
- Develop multi-layered scheduling scenarios to maximize utilization and prioritize course needs
- Track historical trending reports for utilization, seat fill percentage, and more to develop informed strategies for planning

EVENTS SCHEDULING

- Easily track and report all event-related finances and contracts with automated email and notification processes
- Full-service conference and event management, including workflows for the coordination of service departments
- A highly configurable, web-based request process that captures mandatory event details
- Email processes for reservation requesters, service providers, and others that confirm details or changes

SELF-SERVICE & SHARED SPACES SCHEDULING

- Identify and reserve available spaces using mobile devices, the web client, or through room signs
- View floorplans and event information and check into available workspaces using self-service kiosks
- Schedule shared office space to reduce the number of dedicated offices on campus
- Configure, schedule, manage and invoice resources and services such as catering, facilities, security, or A/V

"EMS allows us to efficiently manage room reservations and resources using a distributed model across our campuses and schools. The ability to make room reservations and have clear visibility has positively impacted our overall operational efficiency of managing space across the university."

- University of Notre Dame, Support
