ACCRUENT

MOVING TO THE CLOUD

A visual case for migrating your CMMS database to the cloud

With the soaring cost of network upkeep, maintenance and downtime, many of our CMMS customers have opted to make the transition to a cloud hosting option, allowing them to save money while also reclaiming labor time spent on planned and unplanned IT infrastructure maintenance.

ON-PREMISE HIDDEN COSTS:

On average, the total cost of ownership for 1 server costs upwards of $1476 a month[1].
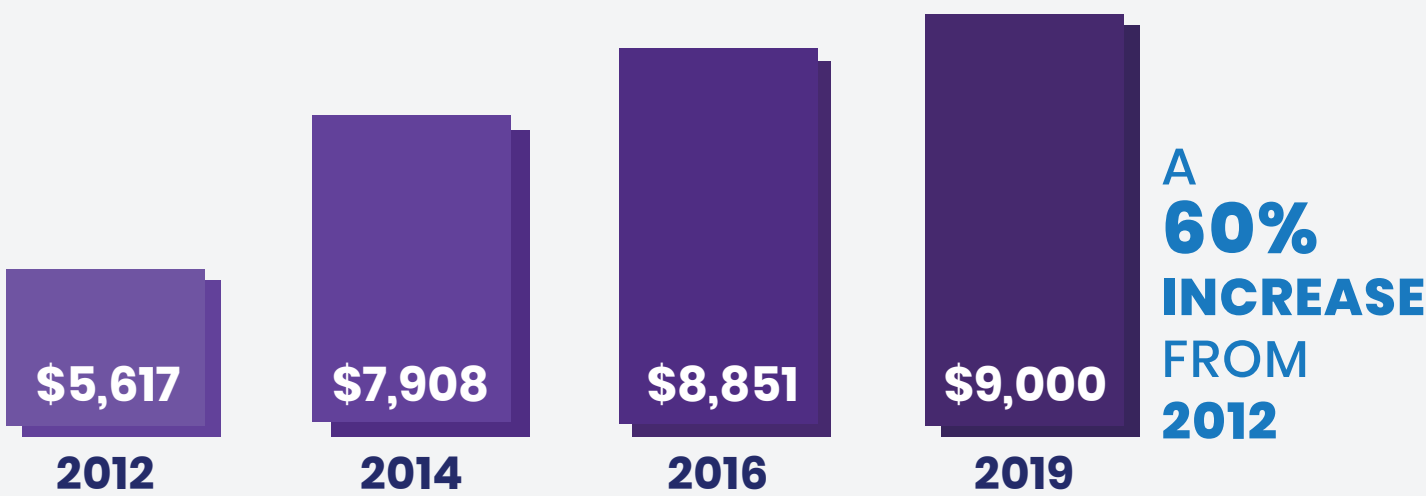

HARDWARE & UPKEEP — **$10,000**/YEAR

OVERHEAD — **$61,000**/YEAR

NETWORK DOWNTIME FINANCIALLY CRIPPLING

The average cost of network downtime spiked to $9,000 per minute in 2019[2].

$5,617
2012

$7,908
2014

$8,851
2016

$9,000
2019

A **60% INCREASE** FROM **2012**

CLOUD HOSTING ELIMINATES ANNUAL COST INCREASES

Hosting in the cloud eliminates the annual cost increases associated with on-premise installations

Servers are typically replaced
EVERY 3-5 YEARS[3]

79% AVERAGE MONTHLY SAVINGS
when switching to cloud on-premise[4]

0% the amount of hardware & maintenance related **PRICE INCREASES** when hosting in the cloud

TRANSITION TO THE CLOUD IS SEAMLESS

Moving your existing CMMS database to the cloud is streamlined

We Do The Heavy Lifting

Our team helps make the move easy, from initial backup to the final login.

Turn Key Cloud Database

The only change your users will notice is a new URL for login.
